Köln, 15.04.2019

Dear Customer,

REACH is a new European directive for Registration, Evaluation, Authorisation and Restriction of Chemicals. The aims of REACH are to improve the protection of human health and the environment, the free circulation of substances on the European market and enhance competitiveness and innovation.

EXTRUFLEX which delivers only finished products is not concerned by the REACH registration. But as chemical products downstream user, our responsibility is to apply the safety measures communicated by our suppliers and inform you as well.

EXTRUFLEX which integrates and masters the manufacturing of its compound for flexible PVC strips and sheets has engaged itself since many years to use only safe and high quality products. Our raw materials registrations should not represent major difficulties for our suppliers.

Our suppliers, PVC resins, plasticizers and additives manufacturers, are well concerned by this registration and have already proceeded to the pre-registration of our raw materials at the European Chemicals Agency.

All our PVC strips and sheets are manufactured in accordance to the actual REACH Regulation with the SVHC`s dated 27.06.2018.

Thank you for your concern and support to our environmental and safety policy.

Best regards

A blue ink signature of Andreas Lasek is written over the text. The signature is stylized and overlaps the "Best regards" and "extruflex" text.
